Dog & Cat Repellers

Technical specs:

Sizes: 130 x 40 x 25 mm
Frequency: 25.000 Hz
Max sound pressure: 120dB
Power supply: 9V 1pcs alkaline battery

New!!! DogSTOP

DogSTOP is the most harmless and efficient way to keep away aggressive dogs. Also this device can be used to train dogs, associating the ultrasounds with a certain command.

DogSTOP® device emits ultrasonic waves with frequency between 25 kHz, which are inaudible for humans, but disturbing for the dogs. Built-in bright LED for flashes and additional working efficiency on night time. Use only alkaline batteries and keep correct polarity. Don't use the repeller on harmless dogs. Don't close up the functioning repeller's speaker to the ear. The powerful ultrasounds will force the dog to leave. DogSTOP will keep a distance between the user and the animal, as long as the button is pressed.

Technical specs:

Effective range: Up to 12 m
Size: 104 x 40 x 28 mm
Weight: 55 gr. (no battery)
Frequency: 20.000 - 25.000 Hz
Max sound pressure: 130dB
Power supply: 9V 1xAlkaline battery

Super DogChaser Plus

The brand new **Super DogChaser®**, is a leap ahead in keeping aggressive dogs away from people. This is the improved version of the DogChaser model, it has the same 130dB powerful ultrasonic speaker, and 2xLED Flash, that helps and increases the effect of the device.

Super DogChaser® device emits ultrasonic waves with frequency between 20 - 25 kHz, which are inaudible for humans, but disturbing for the dogs. The device will repel, and keep away the unwanted dog, if used correctly. For that, the device must be pointed towards the dog, and must press and hold the button. The powerful ultrasounds will force the dog to leave. DogChaser will keep a distance between the user and the animal, as long as the button is pressed.

Technical specs:

Size: 145 x 138 x 82 mm
Weight: 255 gr.
Power Supply: 220 - 240V AC, 50/60 Hz
Consumption: 1,5 Wt
Frequency: 16 - 23 kHz (variable continuous)
Sound Pressure: 130 dB
Efficiency area: 100 m² open space

Animal Chaser

The new **Ultrasonic AnimalChaser®**, emits ultrasound waves with a sound pressure of 130 dB, and a frequency between 16 - 23 kHz. Combined with variations and pulsating sound, the intruding dogs and cats, will never get used to the disturbing sound and will be forced to leave the protected area of around 100 sqm.

Ultrasonic AnimalChaser® Repels dogs and cats of an area up to 100 sqm, range of 15 m, and an angle of 90°. The device includes the main unit with speaker, power adaptor, extension cord, Water protecting case, and screws for fixing.

AnimalSTOP

AnimalSTOP® is the newest, ecological and humane way to repel unwanted animals. It has a very economical, and efficient power supply system, and keeps away all type of unwanted animals (dogs, cats, foxes, squirrels, hares, and other wild animals), without harming them.

AnimalSTOP® has an IR motion sensor to monitor movement on a range of 12 m and an angle

**Technical specs:**

Size: 110 x 100 x 95 mm
Weight: 360 gr. (Main unit + case)
Power Supply: 9 V (2 x 9V battery) or 220 V,
50 Hz adaptor
Start-up Time: 30 sec
Frequency: 18 - 24 kHz
Efficiency area: 100 m², 12m range, 70°
angle.

of 70°, which means a surface around 100 sqm. As soon as an intruder passes this area, the ultrasonic alarm, along with flashes will be activated and the animal will be chased away. This device emits ultrasonic waves in range of 18-24 kHz randomly and continuously, until the intruder is gone. Also, **AnimalSTOP®** can be powered with 2x9V alkaline battery. Used along with the IR sensor, makes the battery last longer. Also, it can be used continuously using the mains power supply.

During night, the effect of the device is amplified by the 2 x ultra powerful LED flashes, which scares away the animals.
